

23rd INTERNATIONAL LASER RADAR CONFERENCE

in Nara, JAPAN

24-28 JULY 2006
Nara-Ken New Public Hall

The suggested list of topics to be covered in this conference is:

- Networking lidars
- Combining lidars and fusing lidars with other sensors
- Advances in lidar techniques and new methodologies
- Atmospheric boundary layer and pollution monitoring
- Tropospheric and lower stratospheric dynamics and transport
- Cloud-aerosol interaction and radiation budget
- Upper and middle atmosphere physics and chemistry
- Space-based missions, validation and global monitoring
- Atmospheric wind and turbulence
- Greenhouse gas monitoring
- Forest, Ocean and Land surface applications

Paper Submission Deadline
March 31, 2006
