

Data format for 1 record

Data format of each header

Case of longer length of segment ($LNSEG$) than the length of a data block ($LNBLK$)

Formats of a segment and a parameter block in Doppler observation mode

Same as Doppler observation mode

(Missing value = 999.)

```
NBLS * {
  NBL_Pairs, dx, dy,
  NHIGH * NBEAM * (SN[0], Re[0], Im[0], SN[1], Re[1], Im[1], SN[2], Re[2], Im[2])
}
```

(Missing value = -999.)

Formats of a segment and a parameter block in coherence observation mode

Format of a segment in raw data mode

Beam 1	Beam 2	[Black Area]

Formats of a segment and a data block in ionospheric power mode
